

# KEEP

# THEM

# SAFE

Even small doses of **METHADONE** or other drugs  
can kill your baby or child...

Make sure you **KEEP THEM SAFE** by locking it away somewhere  
safe where your baby or child **CAN'T** get their hands on it...

**DON'T** use your drugs alone – **PREPARE & PLAN** for someone  
to be there who can look after your child/children
